Investment Consulting

We offer investment consultation and advisory to our client. In this way, they are not left out on any investment opportunity.

Advanced Analytics

We offer a great analytical dashboard for your investment. In this way, you are in the know about how your investment is going.

Customer Insights

We offer a great insights in investment to our clients. In this way, you are sure about what you are dealing with and help build confidence.

OUR SERVICES

What We Offer You

Our investment providing services focus on our clients most critical issues and opportunities: strategy, marketing, organization, operations, technology, transformation, digital, advanced analytics, corporate finance, mergers & acquisitions and sustainability across all industries and geographies.

Financial Market Trading

We Buy or Sell hundreds of CFD assets including major, minor and exotic forex pairs, metals, energies, indices, cryptocurrencies and shares of the world's biggest companies. We trade at some of the tightest spreads available, and enjoy ultra-low trading costs, advanced execution, exclusive analysis tools and world-class market research by our professional traders and market analysts. We access 250+ underlying instruments from our 5 asset classes at some of the most competitive conditions. Our overriding aim is to create wealth for clients like you and to enhance and conserve this for years to come.

Retirement Income

It is important to have a plan that takes into account how retirement may bring changes to both your lifestyle and your finances. For employers, defined contribution retirement plans represent freedom from financial volatility, traditional pension risk, market volatility, and long-term financial uncertainty; however, they also impose new risks and responsibilities on the employer. For employees, defined contributions offer individual control, greater flexibility, and, in an ideal world, access to institutionally priced investments. Secure the future of your finance even after you retire.

Corporate Loans

Access to capital and a strong financial foothold is essential for the success of your company. Whether you are looking for financing from the bank or through alternative methods, there are a number of options available to choose from. We can advise you on the different sources of capital, assist you in accessing financing, manage your risk and compliance and help you evaluate ways to increase your liquidity. We work with clients to articulate their goals and then create an integrated plan to achieve those goals, no matter what phase of the wealth cycle they are currently in.

Business | Project Loan

Complicated financial structures and tax efficient corporate re-structure is not for everyone. Sometimes all we need is a simple business loan without the hassle, head-ache and high interest rates often associated with high street and mainstream bank loans and overdrafts.

Aside from being expert at creating dynamic and efficient financial facilities and bespoke corporate financing, we are also expert at providing facilities for straight-forward, simple business loans.

BG | SBLC Monetization

We are experts in the Monetization of Bank Guarantees (BG) and Standby Letters of Credit (SBLC) and other Financial Instruments. We have direct relationships with proven Issuers and Monetizers who offer a complete range of Non Recourse and Recourse programs. Monetization typically takes 10 days and returns are between 50% and 90% Non Recourse (depending on the BG and SBLC Type)

Scrutinization

Securitization also has benefits for investors. It widens their choice of available investments. The asset backed securities created by Securitization may also be easier to analyse as investors need only evaluate the cash flows from a small pool of assets, instead of a whole complex business. The assets most often securitised are loans of one kind or another which are usually (when pooled, not individually) a low risk investment.
